

PARTHA MARELLA

Phone: (412) 708-7024 | marellaparth7c@gmail.com | www.linkedin.com/in/parthamarella | Dallas, TX

Data Scientist with 5+ years of experience delivering analytics and ML solutions while collaborating with diverse stakeholders across business, engineering, and leadership. Highly adaptable, comfortable handling ad-hoc priorities, and continually learning new technologies to drive impact in fast-changing environments.

EDUCATION

University of Cumberlands

Williamsburg, US

Present

- PhD in Information Technology, Artificial Intelligence Specialization.
- Coursework: Ethics in AI, Enterprise Risk Management, Inferential Statistics in Decision Making

Carnegie Mellon University, Heinz College

Pittsburgh, US

Dec 2022

- Master's in Information Systems Management, Business Intelligence & Data Analytics Specialization.
- Coursework: Java, Python, Optimization, Machine Learning, Database Management, Data Analytics, Big Data.

PES University

Bengaluru, IND

May 2019

- Bachelor of Technology in Computer Science, Data Science Specialization.
- Coursework: Operating Systems, Python, C, Data Structures, Algorithms, Scripting, Web Development, Data Science.

WORK EXPERIENCE

WorldLink LLC

Irving, TX

Aug 2023 - Present

Data Scientist

- Built a Text-to-SQL generative AI workflow that **reduced query-generation time by 90%** and eliminated manual overhead of understanding complex data structures, significantly improving analyst efficiency.
- Developed topic-modeling pipelines (LDA/embeddings) to group unstructured reports, **improving searchability and reducing manual classification** efforts significantly
- Designed a custom MCP client with widespread adoption across teams, reducing development and testing time for new MCP servers and **cutting rework cycles by 50%**.
- Built automated MCP server functionality to democratize access to key metrics (acquisition, transactions, billing cycles, and more), enabling faster insights, standardized reporting, and self-serve data retrieval across teams.

Hitachi Vantara

Chicago, IL

Jan 2023 – Aug 2023

Data and Software Engineer

- Automated ETL processes across billions of rows of data, which **reduced manual workload by around 30% monthly**.
- Collaborated with cross-disciplinary teams to devise a modular code in Java that imports/exports contextual collections of business terminologies called glossaries across versions of product, thereby developing portability.
- Ingested data from disparate data sources using a combination of SQL, Google Analytics API, and Salesforce API using Python to create data views to be used in BI tools like Tableau.
- Expanded tagging capabilities by **building two new glossaries with over 150 new terms** related to the Financial and Health care industries for automatically tagging data warehouses. Wrote regexes and created seed data, forming business logic.

Merkle

Bengaluru, IND

Jul 2019 – Apr 2021

Data Analyst

- **Led team of 4** to curate dashboards to keep track of pending (unattended) online orders over a given period, helped client reach a staggering **96% fulfillment of orders** during holiday season and contributed to a **revenue increase of \$3 million**.
- Structured dashboards in Tableau to refresh data from client's database and insightfully present the data based on the client's requirements. Extensively used business intelligence along with SQL and Tableau to build KPI centric dashboards.
- Spearheaded automation for all reporting deliverables, thereby **reducing manual intervention by 3 hours daily** and enhanced productivity deploying NumPy and Matplotlib for data manipulation and visualization.
- Designed a model to understand customer attrition for a client with an **accuracy of 90%** and helped anticipate correct drivers of reducing customer counts and helped provide business solutions to **decrease attrition rates from 45% to <10%**.

PROJECTS

[Machine Learning | Python] Predictive Analysis of Investment Strategies on LendingClub.

- Owned tasks to create machine learning models to forecast investment outcomes. Individual models trained for each category in LendingClub with key customer attributes such as income, credit history, and house ownership type.
- Implemented various models such as Linear/Logistic Regression, Decision Trees, and Random Forests to construct an optimal investment strategy based on customer's risk appetite.

[SQL | R programming] Efficient SKU Replenishment

- Accomplished an efficient pricing strategy based on seasonality of sales volume leveraging time series forecasting algorithm. The model was coded in Python.
- Aggregated SKU stock information from various data warehouses to construct a model to accurately surmise the SKU replenishment cycles based on demand and seasonality, increasing client revenue by 35% and eliminating out-of-stock scenarios. Generated a centralized database by aggregating various store-level databases leveraging SQL and R programming for querying and automating, respectively.

SKILLS

- Database & Big Data: SQL (NoSQL, MySQL, PostgreSQL), Hadoop (Hive, Spark), Azure, Athena, Docker, ETL
- Statistical Analysis: Statistics, Machine Learning, Neural Networks, Business and Data Analysis, Cloud Analytics.
- Analytics and Visualization Tools: Microsoft Excel, Microsoft Power BI, Tableau, Business Intelligence, Data Visualization.
- Programming Languages: Python, C, Java, R, Linux, Golang, Git, Rest APIs, NodeJS, Bash, Agile Methodologies, Jira.
